

Card Display

Cut two identical tree shapes out of an old corrugated cardboard box (the bigger the better!). Carefully cut out the two slots marked 'A' on the drawing. Now paint the two shapes to look like trees - you can decorate the trees with glitter or silver and gold spray paint. Remember to decorate both sides of each panel!

With a craft knife carefully cut out the slots to hold your cards. Now slip one of the shapes over the top of the other so they lock together. You now have a free-standing seasonal card display for the classroom.
