

Christmas Tree Card

Print (or draw your own version) onto some stiff paper or card.

Cut out the oblong and fold it in half. Cut out the shape of the tree along the thick lines (remember to cut through both layers).

Very carefully, using a craft knife, cut along the dotted lines on ONE SIDE ONLY. Open out the card and then open out the extra cut-out shape of the tree.

You are now ready to decorate your card and write a message inside.
