

Stars - Make a 5 Pointed Star Using Just 1 Cut!

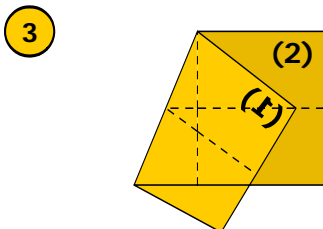

Fold a 21 cm x 25 cm piece of stiff paper in half.

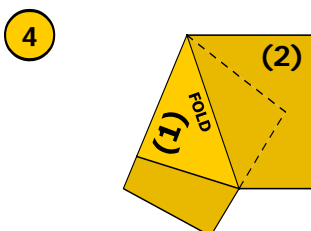

Fold and unfold in half both ways to form creased centre lines. (Note: be sure paper is still folded in half.)

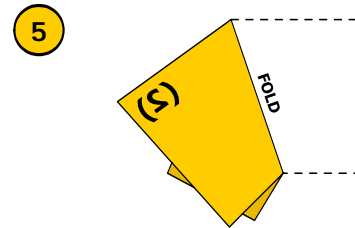

Bring corner (1) right to meet the centre line. Be sure to fold from the vertical crease line.

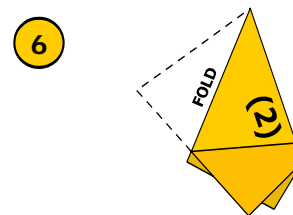

Bring corner (1) left till edges coincide, then make the fold.

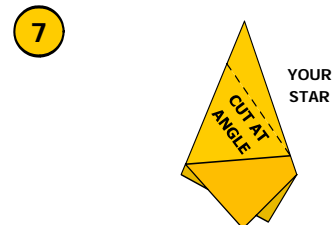

Bring corner (2) right until edges coincide. Then fold.

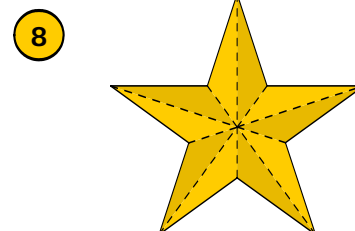

Bring corner (2) right until edges coincide. Then fold.

Cut on the angle as shown in the picture. Then unfold the small piece.

Marvel at your 5-pointed star!

Now colour in your star, make a small hole in one of the points, thread some knotted cotton through it and hang up as a decoration. You could also use old wrapping paper to make patterned stars.

If you have used stiff paper, by carefully squeezing the folds of the points upwards and forcing the shorter folds down the star will take on a 3 dimensional quality.
